PROFILE

I lead development of the credit area at a Colombian fintech: loan origination, credit-limit and credit-risk calculation, identity verification, and credit-bureau integrations. .NET 8/10 with Clean Architecture, SQL Server with Dapper and stored procedures, resilient APIs, and delivery through TDD and adversarial review assisted by AI agents.

EXPERIENCE

Credit Area Tech Lead · .NET Developer — BAGUER S.A.S **2024 – Present**
Full-time · Colombia (Remoto)

- Lead development of the entire credit area for a consumer-credit fintech: loan origination, credit-limit calculation, credit risk, identity verification, and credit-bureau integrations
- Took the core API from 8 test files to 3,009 passing automated tests in ~10 weeks, with 0 failures at every verification gate
- Designed and shipped a second sales channel (web self-service) on the same workflow engine: 16 slices, 41 commits across 2 repositories, 5 additive rollback-safe migrations, and 0 regressions across the 11-scenario in-store channel matrix

Stack: .NET 8, C#, SQL Server, Clean Architecture, Flutter, Dapper, React, TypeScript

Cloud Software Architect & Independent Developer — STARSOL **Jan 2024 – Present**
Contract · Colombia (Remoto)

- Led the architectural design, end-to-end development, and cloud deployment of STARSOL, a B2B SaaS platform for the solidarity sector managing the Integral Risk Management System (SARLAFT, SARC, SIAR), digitizing and automating complex loan origination and regulatory monitoring workflows
- Designed an asynchronous architecture with 3 background workers processing jobs simultaneously to decouple heavy tasks from the main web server thread (PHP/Laravel), eliminating bottlenecks in financial file processing
- Developed a .NET MAUI client application for advanced file management integrated with the STARSOL ecosystem, enabling offline processing and cloud backend synchronization

Stack: PHP, Laravel, AWS, .NET MAUI, MySQL, Docker, CI/CD

Open Source Maintainer (Fork) & Flutter Developer — Harmony-Music **Jun 2026 – Present**
Open source · Colombia (Remoto)

- Took over maintenance of the Harmony-Music fork (Flutter music streaming app for Android, Windows, and Linux) after the original creator abandoned it in December 2025, applying a 4-phase triage methodology that took the app from "does not compile" to release v1.12.2 with modern toolchain
- Modernized the complete build stack — Gradle 8.14, AGP 8.11.1, Kotlin 2.2.20 with modern DSL — removing residual Flutter migrator flags and migrating to Flutter built-in Kotlin to prepare the app for Flutter 3.5+
- Resolved 19 waves of Flutter 3.4x+ deprecations (withOpacity→withValues, Color.value→toARGB32, ThemeData getters→colorScheme, ionicons→Material Icons) in 19 separate commits, demonstrating ability to execute large-scale code audits

Stack: Flutter 3.44+, Dart, GetX, just_audio, media_kit, audio_service, youtube_explode_dart, Hive, Dio, JNI, Gradle, AGP, Kotlin DSL

Full Stack .NET Developer — Cliente — Franquicias de Ropa **2025 – 2026**
Contract · Colombia (Remoto)

- Extended the corporate CRM document routing system to support 3 new payroll types (Commercial, Administrative, Seasonal) for a clothing franchise chain, adding IDs and specific cases without affecting 45+ existing legacy types
- Designed and implemented 21 Crystal Reports templates (7 per payroll type) organized in a dedicated folder structure, following the existing system pattern for consistency
- Implemented dynamic document routing by modifying contract, letter, and termination generation logic, achieving a non-invasive extension with zero regressions on existing operations

Stack: C#, .NET Framework, Crystal Reports, SQL Server, ERP, CRM

Full Stack Developer (.NET & JavaScript) — CAMPUSLANDS **Feb 2023 – Jan 2024**

Bootcamp · Colombia

- Developed a comprehensive software solution under Scrum agile methodology for operational management of a logistics model
- Designed a highly scalable backend in .NET grounded in SOLID principles with Fluent API for data mapping
- Orchestrated the design, normalization, and administration of the MySQL relational database

`Stack: C#, .NET, MySQL, JavaScript, HTML/CSS, Scrum`

.NET Backend Developer — BAGUER S.A.S **2021 – 2023**

Full-time · Colombia (Remoto)

- Developed and maintained third-party API integrations (CIFIN credit bureaus, payment gateways, Infobip messaging services) processing thousands of daily transactions
- Implemented REST APIs in .NET with Dapper and SQL Server, optimizing queries through indexes and caching
- Built automated reporting systems with Crystal Reports integrated into the ERP, eliminating hours of manual work from the analytics team

`Stack: C#, .NET Core, Dapper, SQL Server, REST API, Crystal Reports`

Web Developer — ESPEJOS GLAM **Jan 2022 – Jan 2023**

Full-time · Colombia

- Responsible for end-to-end development of the commercial web platform, managing the full product lifecycle: from requirements gathering and UI/UX mockup design to technical implementation using PHP, JavaScript, HTML, and CSS
- Executed business logic integration, content optimization, and automated deployment to production servers, ensuring site stability

`Stack: PHP, JavaScript, HTML, CSS, UI/UX, Deployment`

SELECTED PROJECTS

Loan Origination System (LOS) **2025 – 2026**

The API went from 8 test files to 3,009 passing automated tests in ~10 weeks, with 0 failures at every verification gate.

`Stack: .NET 8+, C#, Dapper, SQL Server, Clean Architecture, REST API, JWT, Strategy Pattern`

DevManager — Multi-tenant Project and HR SaaS with an AI Agent **Degree project – Present**

852 API tests and 52 Playwright end-to-end tests, built delivery by delivery in slices under 400 lines.

`Stack: .NET 8, C#, Clean Architecture, SQL Server, React, TypeScript, LLM tool calling, SSE, xUnit, Playwright`

Credit Bureau Integration API — Datacredito **2024 – 2025**

Drastic query time reduction (from 3+ seconds to sub-second) through optimized indexes and credential caching.

`Stack: .NET 8, C#, Dapper, SQL Server, Polly, Serilog, JWT, REST API, Strategy Pattern, Factory Pattern`

EDUCATION

Systems Development Engineering — Unidades Tecnológicas de Santander (UTS) **2024 – Present**

Systems Technology — Unidades Tecnológicas de Santander (UTS) **2024 – 2026**

Analysis and Development of Information Systems Technology (ADSI) — SENA — Centro de Producción Limpia (LOPE), Nariño **2022 – 2024**

Intensive Software Development Training (Bootcamp) — Campuslands **2023 – 2024**
